

Date	30 OCTOBER 2022
Team ID	PNT2022TMID28900
Project Name	Virtual eye – lifeguard for swimming pool to Detect Active Drowning

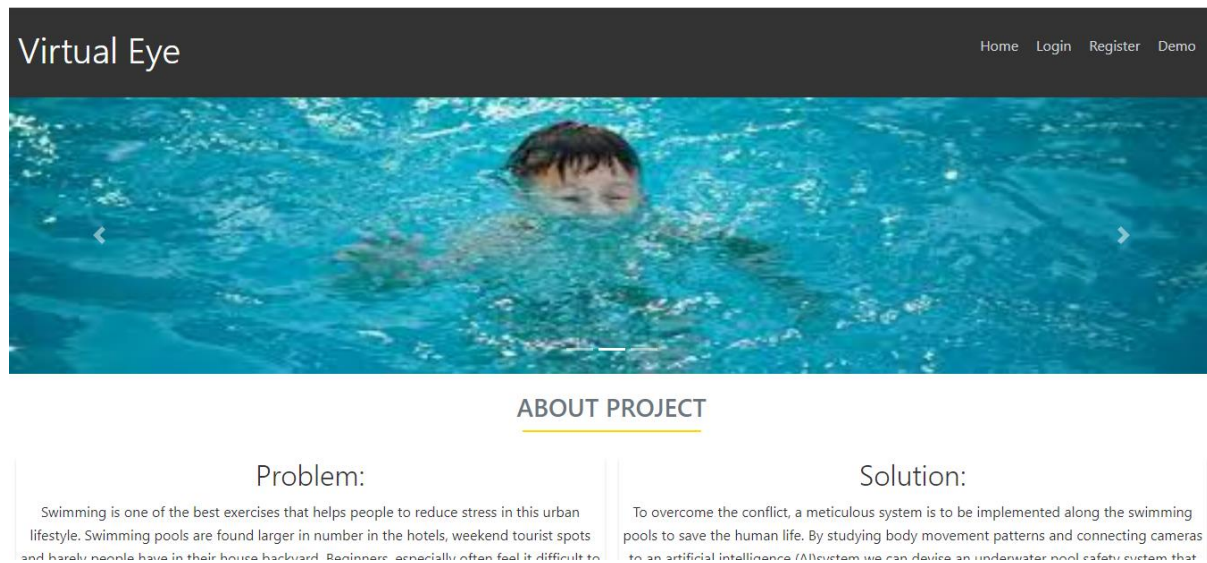

Build HTML Pages

For this project create three HTML files namely

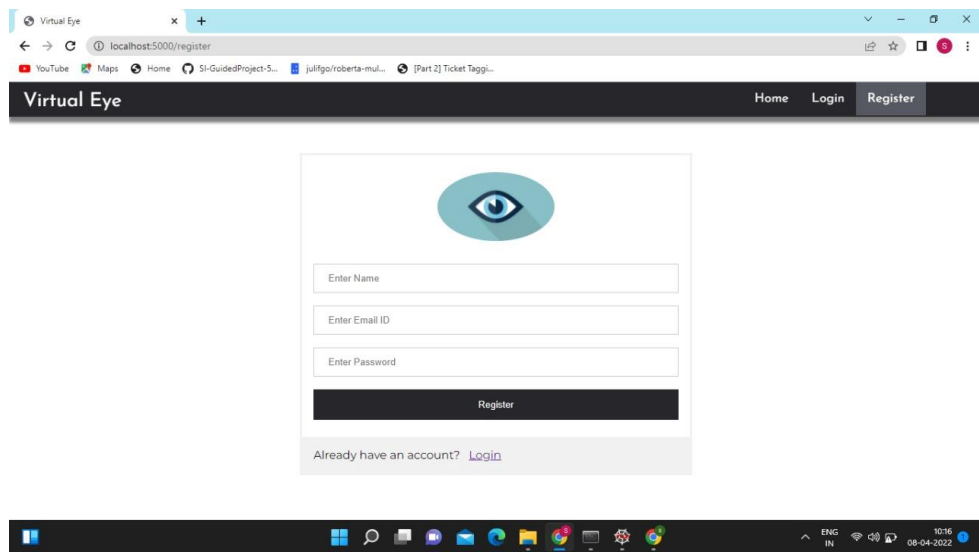

- **index.html**
- **base.html**
- **register.html**
- **login.html**
- **prediction.html**
- **logout.html**

and save them in the templates folder.

Let's see how our index.html page looks like,

Let's look how our register.html file looks

Virtual Eye- Life Guard for Swimming Pools to Detect Active Drowning

Swimming is one of the best exercises that helps people to reduce stress in this urban lifestyle. Swimming pools are found larger in number in the hotels, weekend tourist spots and barely people have in their house backyard. Beginners, especially often feel it difficult to breathe under water and causes breathing trouble which in turn cause a drowning accident. Worldwide, drowning produces a higher rate of mortality without causing injury to children. Children under six of their age are found to be suffering the highest drowning mortality rates worldwide. Such kinds of deaths account for the third cause of unplanned death globally, with about 1.2 million cases yearly.
